Vegan Statement

The granulated white sugar, liquid sugar and powdered sugar products produced by Michigan Sugar Company are acceptable in a vegan diet.

Michigan Sugar Company attests that there are not any animal products, including bone char, used in the production of sugar or in the production of the cornstarch used as ingredient in powdered sugars. Additionally, there has been no animal testing by Michigan Sugar Company or by the suppliers of ingredients to Michigan Sugar Company.

Pioneer brand products are certified by Vegan Action and have the Vegan Action Certification Mark on labels. Although private label brands packaged by Michigan Sugar are equally qualified as vegan, they are not authorized to have the Vegan Action Certification Mark on their packages.
